

Calculadora del costo total de propiedad (TCO)

Calcule los ahorros de costos que puede realizar migrando sus cargas de trabajo a Azure

 My saved reports

According to your inputs, it looks like there are no cost savings in this instance.

Here are other ways Azure could help lower your costs:

Rightsize your infrastructure as you migrate to the cloud for substantial savings. Explore [Azure Migrate \(/es-mx/services/azure-migrate/\)](/es-mx/services/azure-migrate/) to analyze your environment and get intelligent recommendations for your cloud infrastructure.

Consider replatforming your applications to save costs. Save more by moving to managed services like Azure App Service or Azure SQL Database, which costs less and have smaller management costs.

Using lower cost Azure regions with the same services can lead to lower TCO. From the View Report section, explore some nearby Azure regions to model your cost savings.

Take advantage of additional discount programs when you enroll in an Enterprise Agreement with Microsoft. Please contact your Microsoft sales representative for more information.

Over 5 year(s) with Microsoft Azure, your estimated cost savings
could be as much as **USD 0**

Total on-premises vs. Azure cost over time

Savings from running workloads in Azure accrue over time. The following shows how those savings add up over years.

Total on-premises over 5 year(s)

[Chatee con el personal de ventas](#)

TCO of on-premises environments tends to be driven by compute and data center costs.

Total Azure cost over 5 year(s)

In Azure, certain cost categories decrease or go away completely.

Total on-premises cost breakdown

In Azure, several of the cost categories from the on-premises environment are consolidated and decrease with the efficiency that comes with the cloud.
